

Additional Resources to learn more about The Christian World View and Evolution

www.in1000.org My own website which has the curricula that I have assembled for Apologetics and Church History on the Discipleship Page, as well as resources for Evangelism and Current Outreach Projects.

www.onlinebible.net not only has resources for Bible study, Bibles, Commentaries, Dictionaries, etc. but also has a good “Books” section that includes has many great works which available as **free downloads**.

Jonathan Sarfati

Refuting Evolution seeks to redress the lopsided pro-evolutionary way in which origins are taught. The NAS guidebook, which is compiled by many leading evolutionists, obviously contains the most up-to-date and major arguments for evolution. Thus, this critique of it addresses current evolutionary theory as taught in colleges, public schools, and as broadcast by the media. Refuting Evolution responds to many of the arguments in Teaching about Evolution and the Nature of Science so that a general critique of evolution can be made available to challenge educators, students, and parents. At the same time, Refuting Evolution gives as much positive information as space permits to defend the creationist position. Thus, it provides a good summary of the arguments against evolution and for creation. It should stimulate much discussion and help students and teachers to think more critically about origins.

Refuting Evolution 2 - Belief in creation is “nonsense.” Creation is “a religious view that has nothing to do with science.” Daily, the airwaves and newspaper racks are filled with such inflammatory claims.

The barrage of new arguments and scientific “evidence” that “prove” evolution can seem overwhelming to believers in the Word of God, who are ridiculed as irrational religious zealots who still live in the dark ages and believe the Bible’s “fables” about creation. It is more crucial than ever that believers are “ready” to defend their faith. {#1Pe 3:15}

This book pulls together the most powerful arguments that Christians are likely to hear from today’s leading evolutionary scientists. These arguments come from two powerhouses in the media—PBS-TV and the journal Scientific American—which have taken up the mantle of the pro-evolution crusade, preaching their message to a broad market around the world. PBS summarized the modern arguments for evolution in its lavish eight-hour series Evolution, which still airs and is shown in schools across America. It has also aired in Australia. Scientific American pulled together its own best arguments in a combative cover story, “15 Answers to Creationist Nonsense.”

Philip Mauro’s

Evolution at the Bar The writer of this article was for upwards of twenty years a believer in and student of the philosophy of materialism; but after his conversion to faith in Jesus Christ he rejected it in toto, first because it was found to be contrary to the Scriptures, and second, because, upon careful investigation, it was also found to be opposed to every pertinent fact of history and natural science.

As regards "evidence" in support of the theory there is none that would be admitted in any court of law. It rests wholly upon unprovable assumptions, and upon highly speculative and

far-fetched inferences. The evidence against it is abundant and convincing; and while the subject is so vast and complex that we can present, in an article like this, only a small part of the counterproof, yet we can give all that is needed in order to show that the theory is not only unsupported by proof, but is opposed both to the facts of science and to statements of Holy Scripture.

Other great resources are on the websites listed below:

www.carm.org - CARM is 501(c)3 non-profit, Internet based ministry with three main goals:

Bring glory and honor to God

CARM does this by presenting the gospel of our Lord and Savior Jesus Christ....

Equip Christians in the truth

CARM does this by providing information on Christian Doctrine, theology, evangelism, and other subjects. The goal is to present an accurate and biblical representation of Christian truth and answer the objections of critics of Christianity.

Lead non-Christians to Christ.

CARM does this by answering objections, teaching biblical truth, and promoting the saving gospel of Christ.

More great Apologetic sites:

www.apologeticsgroup.com

www.bible-researcher.com

www.reformed.org

www.origins.org - Origins.org focuses primarily on the scientific theory known as Intelligent Design and reaches one logical conclusion: that the universe and life show verifiable signs of intelligent creation because there is an intelligent Creator. Some of our resources deal with scientific data exclusively and some take the defensible position that the data point to and support the Biblical claim of Divine Creation. We let the resources speak on their own merits.

www.icr.org - Institute for Creation Research. We believe God has raised up ICR to spearhead Biblical Christianity's defense against the godless and compromising dogma of evolutionary humanism. Only by showing the scientific bankruptcy of evolution, while exalting Christ and the Bible, will Christians be successful in "the pulling down of strongholds; casting down imaginations, and every high thing that exalteth itself against the knowledge of God, and bringing into captivity every thought to the obedience of Christ" (II Corinthians 10:4,5).

www.drdino.com Creation Science Evangelism. Creation Science Evangelism was started in 1989 by Dr. Kent Hovind. Kent Hovind is one of the most requested speakers on the Creation and Evolution topic in churches and Universities all over the world. Dr. Hovind served as an educator for many years teaching Biology, Anatomy, Physical Science, Mathematics, Earth Science, and many other sciences. Dr. Hovind has debated the Creation and Evolution controversy over 100 times all over the world, in many large Universities, and on thousands of radio talk shows.
